Querying a linked sql server Stack Overflow

@AndreasNiedermair A) SQL Server is only half of the Linked Server relationship - the server you're directly accessing. The 'other' linked server may or may not be SQL Server, and to announce that the 4-dotted-part is the way to reference it it will leave those who are linking non-SQL Server scratching their heads wondering why it's not working for them B) I don't understand what non
