BENEFITS OF SERVICE ORIENTED ARCHITECTURE

RELATED BOOK :

Service oriented architecture Wikipedia
A service-oriented architecture (SOA) is a style of software design where services are provided to the other components by application components, through a communication protocol over a network. The basic principles of service-oriented architecture are independent of vendors, products and technologies. A service is a discrete unit of functionality that can be accessed remotely and acted upon

Service orientation Wikipedia
Service-orientation is a design paradigm for computer software in the form of services.The principles of service-oriented design stress the separation of concerns in the software. Applying service-orientation results in units of software partitioned into discrete, autonomous, and network-accessible units, each designed to solve an individual concern.
