James Serra 's Blog
If you are building a big data solution in the cloud, you will likely be landing most of the source data into a data lake. And much of this data will need to be transformed (i.e. cleaned and joined together the T in ETL).). Since the data lake is just storage (i.e. Azure Data Lake Storage Gen2 or Azure Blob Storage), you need to pick a product that will be the compute and will do the

Production use and fate of all plastics ever made
Plastics have outgrown most man-made materials and have long been under environmental scrutiny. However, robust global information, particularly about their end-of-life fate, is lacking. By identifying and synthesizing dispersed data on production, use, and end-of-life management of polymer resins, synthetic fibers, and additives, we present the first global analysis of all mass-produced
