X 25 Wikipedia

X.25 is an ITU-T standard protocol suite for packet-switched wide area network (WAN) communication. An X.25 WAN consists of packet-switching exchange (PSE) nodes as the networking hardware, and leased lines, plain old telephone service connections, or ISDN connections as physical links.. X.25 was originally defined by the International Telegraph and Telephone Consultative Committee (CCITT, now

Internet Firewalls Frequently Asked Questions Interhack

In Figure 1, a network layer firewall called a ``screened host firewall'' is represented.In a screened host firewall, access to and from a single host is controlled by means of a router operating at a network layer. The single host is a bastion host; a highly-defended and secured strong-point that (hopefully) can resist attack.

How Latency Can Make Even Fast Internet Connections Feel Slow

Latency vs. Bandwidth. Internet connections, including satellite Internet connections, are advertised with speeds like up to 15 Mbps. You may look at a satellite Internet connection offering this speed and assume the experience of using it would be comparable to the experience of using a 15 Mbps cable Internet connection, but you would be wrong.

How long does buprenorphine withdrawal last

Buprenorphine can be a useful drug prescribed to treat opiate addiction. Because it is a partial agonist, buprenorphine (used in brand name medications such as Suboxone and Subutex) results in a milder degree of physical dependence and is associated with milder withdrawal syndrome following cessation.

Cattle Drives and Cowboys What It Was Really Like

When you think of the days of the great western cattle drives and cowboys you might just think of all those western movies and television series that were made. While these were entertaining, quite a bit about the daily life of the western cowboy and the actual mechanics of a cattle drive were romanticized to the point of being inaccurate.
