SSO Single Sign On Authentication on RDS Windows OS Hub

Single Sign-On (SSO) is the technology that allows an authenticated (signed on) user to access other services without re-authentication. Applied to the Remote Desktop Service, SSO allows a user logged on to the domain computer not to reenter account name and password when connecting to RDS servers or launch published RemoteApp applications.

How to configure Firefox for NTLM SSO Single Sign On

I modified signon.autologin.proxy to be true (by double-clicking on the preference name) and changed network.negotiate-auth.trusted-uris to timecard.example.com and it's working for me, almost too well. When I sign out of the page, it takes me to a sign-in screen, where I'm instantly logged in again. But I can live with that. What is missing is a way to either (a) add another URI with a single
